

I am a Kent, CT voter urging you to pass SB184 and HB5762 to continue absentee voting. Covid-19 is still around and there is no guarantee another bad variant will return in the months or years to come. People should be able to vote without putting themselves and their families at risk of infection. Beyond pandemic issues, absentee voting is important for those who cannot get off work or find someone to fill in on child-rearing responsibilities to vote. It is also useful for those who lack easy transportation to the polls and for inclement weather situations.

Please pass SB184 and HB5762 and protect our voters.

Eric Brown
